NewBlue Paint Effects comes with an adjustable palette and paint brushes to give you total control over your look. Whether you're transforming your shots to look like a character from a storybook, or taking the scenery down a movie poster style, NewBlue Paint Effects has you covered.Q: What is wrong with my Ruby in my View? I have a page with an if statement in the view if params[:q].present? @question_data = Question.joins(:job_post).where("job_post.id =?", params[:q]) @question_data = Question.joins(:job_post).where("job_post.author =?", current_user.id) if current_user @job_data = Job.where(:category_id => params[:category_id], :location_id => params[:location_id]) else @question_data = [] @job_data = [] end When I call a view that has this code, I get an error undefined method `has_key?' for nil:NilClass I'm not sure how to call this if statement or if it is just a syntax error I have made in my view. UPDATE I made some changes. Now I get two errors. Syntax error, unexpected ')', expecting '{' Syntax error, unexpected ')', expecting 'end' I don't have access to the #params method. Is there a way to call this method? A: You are missing braces around the if: @question_data = Question.joins(:job_post) if params[:q].present? @question_data = Question.joins(:job_post) if current_user @job_data = Job.where(:category_id => params[:category_id], :location_id => params[:location_id])

What's New in the?

Make your video to look like a drawing, painting or cartoon with a click of the mouse. NewBlue Paint Effects features 134 presets in 12 distinct video effects designed to transform your scenes with artistic color and captivating paint techniques. Among NewBlue Paint Effects' featured plugins is Cartoonr Plus, an enhanced version of NewBlue's wildly popular cartoon-look effect. This collection includes: Cartoonr Plus, Charcoal, Colored Pencil, Halovision Plus, Impressionist, Mosaic, Mural, Oil, Paper Collage, Pencil Rubbing, Posterize, Water Color. NewBlue Paint Effects Features: Cartoonr Plus NewBlue Paint Effects' Cartoonr Plus is an enhanced version of the wildly popular cartoon-look effect. This plugin allows you to add a strong cartoon look to your footage, complete with a range of colors and presets that are both fun and sophisticated. Available in Normal or Ultra modes, Cartoonr Plus provides a subtle color palette that lends itself to even the most demanding look. You can edit the most vivid colors to match your video theme, or go for a slightly muted look that plays up the painterly design of the package. Charcoal NewBlue Paint Effects' Charcoal is a high-quality, state-of-the-art charcoal drawing effect. This effect is perfect for adding a sketchlike element to your videos, as it works well with both dark and light scenes. It's as easy to use as it is versatile. Choose from four distinct types of charcoal, each with a range of paint colors. Give your charcoal sketch a base color by using the Paste function, or change the underlying color of your footage with the Hue option. Halovision Plus NewBlue Paint Effects' Halovision Plus is an enhanced version of the popular halos effect. This is a real charmer, with a variety of different halos to choose from, each with a range of colors and settings. The Halovision Plus effect features a user-friendly workflow that makes it easy to control the colors and settings, or manipulate them at will. The focus mode is available in Normal, Vivid or Off modes, depending on your video style. You can change the size of the halos, and customize them to your exact tastes. Halovision Plus is ideal for use on soft light and dark videos, as well as for creating attention-grabbing effects. Impressionist Impressionist is a convenient video enhancement plugin that adds an attractive painting look to your footage. This effect is great for creating a more relaxing or serene look to your footage, with a range of colors and presets that reflect the mood of your scene. You can choose between seven soft colors, or select from six distinct hues, plus two custom colors. Both light and dark footage
